

Sathish Chakali

Full Stack Developer | React, JavaScript & REST APIs | PL/SQL & MongoDB

Hyderabad, India | +91 6301343762 | sathishchakali1023@gmail.com | linkedin.com/in/sathish-chakali-91221b320 | github.com/sathish3201

Professional Summary

Full stack developer with 1.6+ years of experience at Accenture, building production Oracle PL/SQL systems by day and independently shipping complete full-stack projects on the side — React on the frontend, and Node.js/Express, REST APIs, and MongoDB on the backend. Has built and deployed a full MERN-stack SaaS mock interview platform with JWT authentication and live LLM-based grading (Groq/Llama), a full-stack business marketing site with a working contact form and built-in FAQ chatbot, an e-commerce storefront demo with Razorpay test-mode checkout and server-side payment verification, an Oracle ETL data warehouse pipeline with production-style exception handling, a documented SQL performance tuning case study, and an n8n + LLM incident-triage automation — all version-controlled on GitHub, several with live public deployments on Render. Comfortable with Git-based workflows, debugging, and deployment end-to-end, from local development to publicly accessible URLs. Currently extending backend experience into Node.js REST APIs and AI-assisted workflow automation (n8n, Claude/LLM integration). Java Full Stack Certified (Wipro TalentNext); eager to learn, curious, and looking to grow with a collaborative team.

Core Skills

Frontend: HTML, CSS, JavaScript, React (UI Development), Tailwind CSS

Backend: Node.js & Express, Oracle PL/SQL & APEX, Java, Python, Django (REST Framework)

APIs & Databases: RESTful API Development, MongoDB (NoSQL), MySQL, PostgreSQL, Oracle SQL

AI & Automation: LLM API Integration (Groq/Llama, Claude), n8n Workflow Automation, Structured Prompting

Version Control & Deployment: Git/GitHub, CI/CD Pipelines (GitHub Actions), Render, GitHub Pages, MongoDB Atlas

Debugging & Testing: Root-Cause Analysis, SQL Performance Tuning (Optimizer Hints, DBMS_STATS, EXPLAIN PLAN)

Collaboration: Agile/Hybrid Team Collaboration, Clear Written & Verbal Communication

Professional Experience

Package Development Associate, Oracle Development & Support — Accenture

Oct 2024 – Present | Hybrid

- Write and debug backend code (Oracle PL/SQL packages, procedures, functions, triggers) for production systems, reducing recurring defects by 25% through careful root-cause debugging.
- Tune query performance to improve reliability and scalability, cutting execution time on high-volume queries by 35%.
- Work with REST APIs and cross-system data flows to diagnose and resolve integration issues across 2 daily production jobs.
- Collaborate with a 3-member hybrid team — clear written and verbal communication on issue status and fixes — achieving 95% SLA compliance and 97% on-time completion.
- Document recurring issues and fixes in a shared knowledge base for team-wide use, reducing repeat issues by 20%.

Projects (Full Stack & AI, on GitHub)

MockGenius AI — SaaS Mock Interview Platform — Full MERN-stack app simulating technical mock interviews: JWT authentication, AI-generated interview questions, instant LLM-based grading (Groq/Llama), speech-to-text answer input, and a score-progression dashboard; deployed end-to-end (Render + MongoDB Atlas) — [Code](#) | [Live Demo](#)

Nexoria Technologies — Business Website — Full-stack marketing website for an IT services business: React frontend with a Node/Express backend serving services, pricing, and portfolio content, a working contact form with email notifications, and a lightweight built-in FAQ chatbot — [Code](#) | [Live Demo](#)

E-Commerce Storefront Demo — Working storefront with product catalog, cart, Razorpay test-mode checkout with server-side payment signature verification, an admin dashboard for inventory and orders, and a built-in FAQ chatbot — [Code](#) | [Live Demo](#)

Oracle ETL Warehouse Pipeline — Star-schema Oracle data warehouse with a PL/SQL package loading staging data into dimension and fact tables, with per-row exception handling, error logging, and batch-run tracking modeled on production ETL support workflows — [Code](#)

SQL Performance Tuning Case Study — Documented before/after tuning exercise on a 2M-row Oracle table using DBMS_STATS, a targeted composite index, and Optimizer Hints, with EXPLAIN PLAN evidence captured for both states — [Code](#)

ETL Incident Triage Automation — n8n workflow that classifies ETL job failures using an LLM and drafts ready-to-paste incident tickets, automating the manual triage step in production data support — [Code](#)

Education

B.Tech, Computer Engineering — CMR Engineering College, Hyderabad | CGPA: 8.5/10

Intermediate (XII) — Sandeepani Junior College, Kamareddy | 2019

Certifications

- **Java Full Stack Certification** — Wipro TalentNext (2023)
- **AI/ML Virtual Internship Certificate** (2023)
- **Smart Coder Certification** — Smart Interviews, Global Rank 1402/22591 (2022)
- **HTML Attributes & Tags** — GL Academy (2022)
